Original ideas, waiting for you.

Biblio aims to push academic research beyond universities, by creating a space where everyone can discover, understand and discuss the latest findings.

ABOUT

Removing barriers to academic research

Our mission is simple: clear the way between academic findings and those who want to engage with them, so that never again someone stir away from valuable knowledge because of overwhelmment, jargon-heavy language, lenght, paywall, unfindability, or any other barrier. Reading academic paper might even become an easy and enjoyable experience!

Powerful ideas, curated just for you

Biblio taps into the brain and hard work of the specialists in the field to bring you the latest insights and unique perspectives on any subject that interests you. Follow your topics of interest, researchers and publications and enjoy a perfectly tailored selection of papers everyday, so you always see what matters to you.

A fully customizable reading experience

Not only does Biblio translates jargon-heavy academic language to everyday english, but we also thrive to make your reading experience as enjoyable as possible. Page layouts are designed for optimal readability and you can make them your own by adjusting the font type, text size, background colors and much more.

Be apart of the community

Join open and productive discussions with researchers and people moving thinking forwards. Biblio offers you the space to further the conversation, challenge your ideas, connect directly with the experts and broaden your knowledge.

Accessible, for real

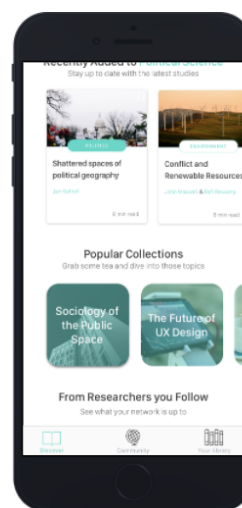

We believe in open knowledge for all. Which is why Biblio is completely free, easy to use, available offline and comes with the option to listen to rather than read the paper

HOW IT WORKS

Take the tour

Welcome to Biblio. Have a peek at what awaits you on the app. We were told an interesting article on Human Design was just published, can you find it ?

"If our research never gets out of the ivory tower, then who is it helping?"
— Jackson Wright Shultz, Researcher

PHILOSOPHY

Giving volume to world-changing knowledge

Academic research is about gathering new information and furthering human knowledge. It has the potential to spur critical thinking, inject nuance and depth to the the public discussion, inform decision-making, empower citizens, come up with new datas and smart solutions and help understand the complex world we live in. However, knowledge produced in universities largely goes unheeded and rarely influences thinking beyond the system in which it was constructed.

To bridge the devide between scholar communities and everyone else, we need to increase the discoverability, comprehension, use and diffusion of academic findings. It's about time for a global movement that pushes academic evidence out into the world in an accessible format so that it does not sit idle behind journal paywalls but makes a difference in the world in which we live.

FEEDBACK

From the Biblio community:

" Three years into my research, I was growing increasingly frustrated. I felt like my hard won work was published into a void. That's when I discovered Biblio. I was able to give my findings visibility, connect with my audience and get feedback in real time! "

Lucy Smith- PhD researcher

" For the first time of my life, I didn't get a headache from reading an academic paper! I never expected that such high quality information could be shared in a comprehensive and accessible format. I also appreciate sharing with Biblio's engaged and active community. "

Jack Scott - Product Designer

" Biblio is trying to make scholar articles accessible to all, and I believe wholeheartedly in their mission. It has allowed me to keep up to date with the latest findings in my field, find new ideas and apply them to my job. "

Alice Pierson - Marketing specialist
